PROFESSIONAL EXPERIENCE

Senior Automation Test Engineer

General Organization for Social Insurance (GOSI)

October 2024 – Present Riyadh, Saudi Arabia

- Lead the design and implementation of comprehensive test automation frameworks for enterprise-level social insurance applications
- Architect and maintain end-to-end automated test suites using Cypress, Selenium WebDriver, and WebdriverIO for web applications
- Develop and execute mobile automation testing strategies using Appium for Android and iOS platforms
- Implement API automation testing using Postman and REST Assured, ensuring seamless integration across microservices
- Conduct performance testing and load analysis using JMeter to validate system scalability and reliability
- Execute security vulnerability assessments using OWASP ZAP and implement security testing protocols
- Integrate automated tests into CI/CD pipelines using Jenkins and Azure DevOps for continuous testing
- Mentor junior QA engineers and conduct knowledge transfer sessions on automation best practices
- Collaborate with cross-functional teams in Agile/Scrum environment to ensure quality deliverables

Senior Automation Test Engineer

Saudi Authority for Data and Artificial Intelligence (SDAIA)

February 2022 – September 2024 Riyadh, Saudi Arabia

- Spearheaded automation testing initiatives for AI-driven government applications and data platforms

ASTQB Mobile App Testing

September 2017

Performance & Security Testing

OWASP ZAP, JMeter

- Developed robust mobile automation frameworks using Appium and WebdriverIO for cross-platform testing
- Implemented web functional automation suites using Cypress with comprehensive test coverage
- Designed and executed API testing strategies, performance benchmarking, and security assessments
- Established UI automation testing standards and best practices across multiple project teams
- Contributed to quality assurance processes for critical national data infrastructure projects

Software Quality Assurance Engineer

Trufla Technology

September 2021 – January 2022

Cairo, Egypt

- Executed comprehensive testing across Android, iOS, and web insurance applications
- Performed performance testing to ensure optimal application responsiveness under load
- Conducted API testing and validation for backend service integrations
- Implemented security testing protocols to identify and mitigate vulnerabilities
- Developed functional automation scripts using Selenium, Cypress, Protractor, Appium, and Katalon

QA Team Lead

Devartlab

September 2020 – September 2021

Cairo, Egypt

- Led and mentored a software support and testing team, ensuring quality deliverables
- Managed daily testing operations and established quality assurance workflows
- Executed comprehensive regression testing for all software updates and releases
- Conducted performance optimization and security vulnerability assessments
- Performed database testing and validation for data integrity
- Developed mobile automation testing solutions for iOS and Android platforms
- Created user documentation, training materials, and technical guides

July 2017

2011

CCNA (Cisco Certified)

December 2011

IT Admin Training

Citi Bank

April 2011

- Delivered quality assurance for ERP, LiveDoctor, CMS, e-commerce, and HR systems

Quality Control Engineer

United for Transport

September 2019 – September 2020

Cairo, Egypt

- Managed all functional testing phases from test planning to execution and reporting
- Conducted performance and security testing to ensure application reliability
- Prepared comprehensive test plans, test cases, and quality documentation
- Handled software deployment and configuration at client sites
- Administered server database operations and data validation testing
- Executed regression and confirmation testing for all change requests

Software Test Engineer

ibex-solutions

October 2017 – August 2019

Egypt

- Executed full software testing lifecycle including unit, integration, system, and acceptance testing
- Performed API testing and data flow validation for complex system integrations
- Managed software deployment, configuration, and post-release support
- Conducted regression testing for new product models and feature releases

Freelance QA Consultant

Independent Contractor

January 2016 – January 2020

Cairo, Egypt

- Provided functional testing services including black-box and white-box methodologies
- Developed automated test scripts using Selenium WebDriver with Java and TestNG
- Performed database testing using SQL Server and MySQL
- Conducted performance testing using JMeter and API testing using Postman
- Executed security assessments using OWASP ZAP

- Created SRS documents, user manuals, and technical documentation

EDUCATION

Bachelor's Degree in Computer Science

Ain Shams University (ASU), Egypt

2009 – 2014 | Grade: Good

TECHNICAL EXPERTISE

- **Automation Frameworks:** Selenium WebDriver, Cypress, Appium, WebdriverIO, Playwright, Protractor, Katalon Studio
- **Programming:** Java, JavaScript, TypeScript, Python
- **API Testing:** Postman, REST Assured, SoapUI
- **Performance Testing:** JMeter, Gatling, LoadRunner
- **Security Testing:** OWASP ZAP, Burp Suite
- **CI/CD:** Jenkins, Azure DevOps, GitHub Actions
- **Databases:** MySQL, PostgreSQL, SQL Server, MongoDB
- **Methodologies:** Agile, Scrum, Kanban, TDD, BDD
- **Tools:** JIRA, TestRail, Confluence, Git, Docker
